

Steven Cornman

I'm a Christian, saved through the grace of God and through the blood of my Savior Jesus Christ. I became a Christian later in my life. Growing up I was taught that church was where you went on Easter and Christmas. Thankfully, a friend told me about a church and a loving pastor in Princeton at a church called PBC. I started going and excepted Christ as my Savior and surrendered my life to Christ at the Christmas program in 1975.

I learned that you need to have a personal relationship with Christ, not just attend church. I attend Bunker Hill Church in Buda Illinois where we "inspire people to know Jesus personally and pursue Him passionately".

I worked at a Steel Company for over 40 years, until it shut down, I started as an inspector then worked my way up to Quality Control/Metallurgical Hourly Supervisor. I went to the production side and started out as laborer and worked my way up to Operations Finishing Hourly Supervisor.

Computer age came about so after work I went to IVCC and took classes in Computers, Statistics, Quality Control, Programming, Business Management and other software classes. About the last 15 years working at the Steel Mill, I became a Site Specialist, programing in Pentagon Language and Implementing Statistical Analysis. A friend and I started B&C Computers selling Gateway & Dell Computers when not at our main job. I became the only Dell Computer Certified Technician within 100 miles from Princeton.

I was a history buff so after Retirement from the mill, I taught parttime for a year, once a week, teaching History and then a semester of The U.S. Constitution at Crossroads, a Christian High School that started up in Tiskilwa, Illinois. After that year, I taught for 8 years at a Christian School in Princeton, teaching grades 6-8, Science, Physics, and History. I retired there and loafed around until last year when I had an opportunity to substitute teach at Sauk Valley Christian Academy in Sterling.

I'm still a history buff, but I love to teach Science and Physics because I can teach students of all ages how ridiculous evolution is and how the only way this universe and others exist is by the Almighty Breath of God. I always start class with prayer and scripture. No better way to start the day.
